

EX735Ag Slider Severe Allergies and Repetitive Stress Pain Eliminated

PATIENT DETAILS:

Gender/age: 45 Year Old Female

Presented condition, complaints: Stress, Allergies/sinus congestion, Upper right shoulder pain.

Past medical history: Performs accounting (so tight shoulder from excessive computer entry), previously suffered from allergies so much that she received weekly injections for years during prime allergy season. This year since using LASER and SCENAR, she has not received any type of allergy shot. This is a first in her recent (10 year) medical history.

TREATMENT:

Time of action during session: ~ 15-30 minutes per session is typical

Action modes used:

SCENAR-COSMODIC /Slider Auto set to Manual 30% – 6 points
SCENAR-COSMODIC /Slider Auto set to Manual 50% – Little Wings
SCENAR-COSMODIC /Slider (C7, L4/L5, Sacrum and other “dose” points)

Areas treated:

6 Points + 7th Pts of Face (Trigeminal Nerve branches & Fpz/third eye)
Shoulder/Neck area – Little Wings location
C7, L4/L5-Sacrum
Superior medial border of right scapula (Levator Scapula/Rhomboid area)

Change of the patient’s condition during and after session:

Prior to session patient shoulder were tight, ability to rotate neck restricted and sinuses had pressure, also a point of pain at superior medial border of right scapula (LScap/Rhomboids). Post session trapezius muscle softened, shoulders dropped in a relaxation response, neck turned freely, pain was totally eliminated and sinus pressure was diminished, and breathing was non-labored. Patient noted, “Now I can breathe though my nose”. Lower back pain was eliminated in earlier sessions not using the Slider.

Total number of sessions: With 735AG Slider – 2; with DOVE and/or 735AG Modific – 3-4 times per month.

Total time of treatment (days, weeks): About 30-35 sessions (uses SC as she needs to when bringing in her son for therapy)

Final result of treatment:

Upper back (rhomboid) pain, neck tightness and sinus congestion is always eliminated during the session. Over the time period she brings her son in for therapy, she has stopped getting allergy shots as a result of using the LET Medical 735AGM.

COMMENTS:

The new 735 Slider is as effective as the Modific. The Slider may feel a little stronger.

Comments on the new device working:

Client didn't notice a substantial difference between the 735AGM and 735AGS, she liked them both equally well but likes the display on the Modific better. She thought the Slider might have seemed a little more powerful.
