

EX735Ag Slider: Full resolution of chronic neck pain in 1 session

PATIENT DETAILS:

Gender/age: 55 Year old female, PhD Nurse.

Presented condition, complaints: Chronic neck/shoulder pain

Past medical history: Had chronic pain associated to C5-C7 area during neck rotation/flexion/extension for years.

TREATMENT:

Time of action during session: ~5 minutes; a little less than 2 ½ minutes per paraspinal

Action modes used: SCENAR-Cosmodic / Slider Auto

Areas treated: Vertical placement (parallel to spine); Left C7 Paraspinal, then right C7 paraspinal

Change of the patient's condition during and after session: No pain, full ROM without pain

Total number of sessions: One

Total time of treatment (days, weeks): One only

Final result of treatment: No pain when performing normal range of motion (head rotation)

COMMENTS:

“That’s amazing! I have been able to reduce the pain, but this time it just went away. It isn’t that there is a little pain, there is absolutely NO pain. How long will this last?”

Comments on the new device working:

The Slider is very efficient especially as compared to the early generation cloned device that this person is familiar with.

What is great about the Slider and all Let Medical Products in general is their efficacy. I have come to expect this over the years and I am never disappointed with Alexander’s latest improvements, Bravo!
