

# EX735Ag Slider: Chronic Shoulder Pain Resolved

## PATIENT DETAILS:

**Gender/age:** 47 Year Old Male

**Presented condition, complaints:** Chronic right shoulder, rotator cuff and Teres Minor pain.

**Past medical history:** Chronic right shoulder, rotator cuff and Teres Minor pain.

## TREATMENT:

**Time of action during session:** ~ 20 minutes

**Action modes used:** SLIDER 10. SCENAR-Cosmodic /Slider Auto, Cosmodic Myo

**Areas treated:** Points of pain on Tere Minor, and Shoulder and Rhomboids.

Static elimination of shoulder pain, then placed 735 AG Slider into S-C/Slider Auto and left ot on last painful spot while patient was performing slow dynamic range of motion (ROM) to further eliminate pain. Finished sessions with Little Wings protocols using Cosmodic Myo setting 7 elevations at 50%.

### **Change of the patient's condition during and after session:**

Pain began to subside, then was totally eliminated. Post session, ROM was dramatically increased and there was no pain during ROM activities. This occurred after each session. Patient's pain was less with more range of motion with each retuning session.

**Total number of sessions:** 3 with 735 Slider, 6 with 735AGModific

**Total time of treatment (days, weeks):** 1-2 week intervals between sessions.

**Final result of treatment:** Pain has not been an issue since the last session. If it returns, patient will call.

## COMMENTS:

### **Comments on the new device working:**

This patient thought the new Slider felt more powerful somehow as compared to the 735AGModific. Both had similar results in that after each session whether the 735 Modific or Slider was used there was no pain post session and Range of Motion was improved.
