

EX735Ag Slider: Juvenile Rheumatoid Arthritis Case

PATIENT DETAILS:

Gender/age: 16 Year Old Female

Presented condition, complaints: Juvenile Rheumatoid Arthritis

Past medical history: Diagnosed with JRA

TREATMENT:

Time of action during session: 30-45 minutes

Action modes used: SCENAR-Cosmodic/Slider Auto + Cosmodic Myo at 40% (Little Wings)

Areas treated:

1. Ankles were most inflamed and painful
2. Wrists inflamed and painful
3. Sore neck and shoulders

Change of the patient's condition during and after session:

1. Ankles – visible reduction in inflammation, warmer to touch, pain was eliminated totally on right leg/ankle, barely noticeable on left leg/ankle.
2. Wrist – visible reduction in inflammation, pain totally eliminated
3. Post C7 dose followed by 5 elevations of little wings, no pain in neck and/or shoulder areas.

Total number of sessions: 1 session. Coming in again next week.

Total time of treatment (days, weeks): One time

Final result of treatment:

Too early to tell long time but with Juvenile RA therapy may be on-going at a maintenance level as her condition dictates.

COMMENTS:

The Slider performed very well. The client used the device on herself for everything except Little Wings and dosing C7. She simply picked up the Slider, placed it on affected areas, eliminated the pain in one area and moved the device to another painful site until they disappeared.

Comments on the new device working:

The 735 Slider is extremely easy to use for people new to this technology it is simply a matter of placing the device on where you hurt and as this pain subsides follow the pain until it is eliminated.
