Change of the patient's condition during and after session:

Before therapy started client walked in and went into a paralyzed state, which was ended with the use of a LASER. Patient was frail with severe allergic responses, had difficulty with foods, and her throat would immediately swell if her food contained gluten. Once sessions progressed, her gluten tolerance was increased, sensitivity was reduced and her medical situation is now solid and hardy. She possesses unique ability to feel energy and sense toxic molds. Several builders ask her to locate and identify toxic mold locations so they can remove them from buildings. She also possesses unique abilities relative to Reike and the use of subtle energy. It was her exquisite ability to sense shifts in energy that made an excellent person to evaluate the 735AG-Modific vs. 735AG-Slider.

Total number of sessions: 1 with Slider

Owns a C-DOVE and LASER for over a year, uses as needed.

Total time of treatment (days, weeks): As needed throughout the year, typically 1-2 times per week depending on exposure levels.

Final result of treatment:

Now much more gluten tolerant, does not "lock up" when exposed to toxic molds but is still affected by them, much more hardy overall. Now she is able to eat a wider range of foods with much less sensitivity.

COMMENTS:

The Slider feels much stronger and has a totally different “energy feel” from the Modific.

Comments on the new device working:

“I really like the energy of this device, it is totally different than the Modific’s feel and especially the earlier generation SCENARs that you waited for the DOSE to signal to let you know it’s done. You can feel the frequency it is using much more strongly and then feel it make a shift to another frequency, like it is pushing a blockage as the energy begins to move differently and releases occur. When the Slider energy changes you can physically feel it push differently as it reacts with your body. The 735AG Slider really resonated with me energetically, much more so than the other models.”
